TUNNEL AT ASHBROOK

Mine to Be Opened at Depth During the Winter.

A MILL IN THE SPRING

MANAGER KEARNS SAYS THE VALEO MAY RESUME.

With magnificent bodies of ideal milling ore already blocked out in its property, the management of the old Ashbrook mine in Box Elder county has just started work on a 650-foot tunnel which is designed to open the vein at a depth of more than 500 feet on its dip and provide an economical means of extracting the ores for treatment when the contemplated combination mill shall have been erected next

spring.

Talking on the subject vesterday, Manager Hugh Park, who recently returned from a conference with eastern shareholders in the company, said that developments to date had proven the ore body to be continuous from the surface to a depth of 175 feet, the vein averaging about fifteen feet. From the bottom of the shaft a drift has been extended about sixty-five feet, all the way in ore, and while a streak of very rich ore makes in the main body, he does not figure on that in estimating the

not figure on that in estimating the value of the mine.

Whether the average values will increase with depth he does not presume to say, but when the tunnel now being or say, but when the tunner now being run under the direction of Superintendent J. P. Turner makes connections with the ore below, he is willing to see a big mill go up, because he is confident that good money can be made whether the ore improves or not. The ground is so located, Mr. Park says, that when the time comes either tun-

ground is so located, Mr. Park says, that when the time comes other tunnels can be sent in and the vein or veins tapped at considerably more than 1,000 feet deep, a fact which makes of the Ashbrook one of the most economical propositions imaginable.

Thousands of tons of good milling ore is now on the dump, and in the work to be performed this winter no more ore than is absolutely necessary will be taken out, as the intention is to avoid handling over again. The tunnel now being run may reach the vein in a much shorter distance than stated, but Mr. Park says the entire winter will be devoted to getting the mine in shape for heavy production, and next season he expects to have the pleasure of seeing the mine made a winner of seeing the mine made a winner of no mean proportions.

FROM PARK VALLEY DISTRICT. Mines are More Active Than at Any Time In Camp's History.

(Special Correspondence.) Park Valley Mining District, Box Elder County, Utah, Oct. 16 .- Greater ac-

der County, Utah, Oct. 16.—Greater activity is manifested among the prospects and mines in this camp than at any time before in its history. The El Amigo is again to resume operations, after an idleness of several months. The company has secured two valuable claims adjoining their former group, which makes a group of nine claims now owned by the company.

The Planetary company has resumed operations. The mine was closed down over a year ago, the directors stating at the time that the property had been bonded to an eastern syndicate. John Snell has the work in charge, and will push operations for the rest of the year. The incline shaft on the property follows the vein to a depth of 140 feet, at which point it is over four feet wide, at which point it is over four feet wide, and samples show an average of about \$42 in gold to the ton, although picked samples assay more than double that value. The ore is a dark sugar quartz. carrying very little mineral except the

carrying very little mineral except the gold

The record being made by the Century mine since the completion of their new mill has done much to encourage those interested in the future of this camp. The results of the first clean-up so far exceeded the expectations of Manager White and those most interested that they are already considering the advisability of enlarging the capacity of the mill. The mine has improved steadily as it has been developed. The vein from which most of the ore is being extracted has increased in width from three feet to over nire, and is so easily worked that one shift of two men keeps the mill supplied with about twenty tons of ore per day. Manager White spent last week at the mine, and is not only very much elated over the showing being made, but also with the men in charge.

the men in charge. E. L. Godbe is the patentee of the E. L. Godbe is the patentee of the cyaniding process used at the Century, and it is likely to take the place of many of the old methods employed in treating certain kinds of ore. One feature of the process which will recommend itself to mining men in districts where water is not abundant is that ore can be worked by it with the use of 15 per cent as much water as the amount of ore treated, the water being used over and over any number of

MAMMOTH DIVIDEND TODAY. One of \$20,000 Will Be Ordered Paid on the First.

After a week at his Nevada ranch, Manager Samuel McIntyre of the Mammoth returned to town yesterday, and after calling the directors together today and ordering a dividend of \$20,000, made payable on the first, he will leave for the mine and see how matters have been progressing during his absence.

With the sum ordered paid today, the Mammoth will have contributed to its shareholders \$1,770,000, with \$440,000 of that total during the year and two months in which Sam McIntyre has been in absolute control, or since he undertook the purchase of his brother's interest. The Mammoth is a great mine, and Mr. McIntyre has been maxing a splendid record since he took personal charge of the property. After a week at his Nevada ranch

Ore and Bullion.

Ore and bullion settlements in this ity yesterday amounted to \$65,420, as McCornick & Co., Mingo bullion, \$3,-90; silver and lead ores, \$19,890.

T. R. Jones & Co., ores, \$18,000; bullion, \$12,000.

Bamberger & McMillan, ores, \$8,420. Commercial National bank, ores, \$3,-

Mining Notes.

The Centennial-Eureka company's \$50,-000 dividend is payable today. The Ophir Hill company sent in seven The Taylor & Brunton sampler was in receipt of seven cars of ore from Stockton yesterday.

It is expected that P. L. Kimberley will land at the Annic Laurie almost any day now and if reports are correct he will come no farther this trip. The long-delayed car of steam pipe for the Honorine has been located at last. It was at Cheyenne yesterday and should be landed at Stockton Monday.

The Utah company has made its promise of a couple of weeks since good and declared a dividend. The amount decided upon was \$2,000, or 2 cents a share, and the distribution is to be made on Thurs day next, the 25th.

day next, the 25th.

Dr. P. A. H. Franklin pulled out for New York Friday and may be gone several weeks. He has his eye on one of the big stices of rich mineral territory in a nearby camp and if matters shape themselves right he will spread the proposition before some of his wealthy clients.

position before some of his weaithy clients.

Superintendent D. R. Williams of the Utah company's Fish Springs bonanza, is in from camp for a few days' recreation and rest for the first time in nearly a year. He reports the mine as being in tip-top condition and everything moving with systematic precision. He will stay in the city several days.

Grand Central shares are booming, and if yesterday's advance is to be repeated today the stock will sail over the \$6 notch. It sold yesterday at \$5.58 and the closing price asked was \$5.5%. Ore is coming to market at a rapid rate and many of the oracles are looking for a whale of a dividend next month. Its reserve fund is estimated at all the way from \$200,000 to \$500,000.

You can trade in New York stocks, grain and provisions on margins. Come or send your orders; direct wire. Rooms 231 anr 232 D. F. Walker building. Phone, 916. Reference, National Bank Republic. E. M. &Co.

Everybody is vitally interested in mining. The Salt Lake Mining Review is the only journal published in this intermountain country exclusively devoting its columns to the industry. \$2.50 year. Subscribe

Clergyman's Son Sought.

San Francisco, Oct. 19.-A firm of so icitors in Aberdeen, Scotland, has reewed a former request to the police of this city for information regarding the whereabouts of William Brown, the son of a Scotch clergyman, who disappear-ed from Bakersfield in March, 1899. A substantial reward is offered to anyone who can find the missing man.

It is a well-known fact that Lydia E. Pinkham's Vegetable Com pound has cured more women than any other remedy. It therefore must be the best possible medicine for female ills.

But some women make the mistake of thinking that they will try something else simply because it is new. That mistake is often a fatal onefatal to the health and happiness of the experiments.

Is it not foolish to risk the possible results of such experiments? Is it not better to depend upon a medicine which has been tried successfully for thirty years, and which has never been found wanting?

Do not therefore let any one persuade you to try something which they say is just as good. It cannot be just as good. Mrs. Pinkham's Compound is the best, and there can be only one best. This is not a mere assertion, but is a positive fact, admitted by hundreds of regular

Rely on your own common sense, and Mrs. Pinkham's life-long experience, and you will make no mistake. Don't experiment with your health, but take a medicine that you know is good, and is backed by such letters as these to Mrs. Pinkham:

Suppressed and Painful | A Grateful Woman Re-Periods Cured by Lydia E. Pinkham's Vegetable Gempound.

"I was thin, sallow and nervous. I had not had my menses for over a year and a half. Doctored with several physicians in town and one specialist, but did not get any better. I finally decided to try your medicine, and wrote to you After I had taken three bottles of Lydia E. Pinkham's Vegetable Compound and three of Blood Purifier, my menses returned, and I feel as well and strong as I ever did and am graining faceb." This did, and am gaining flesh."— Miss Lena Gaines, Visalia, Tulare Co., Cal.

"After following the directions given in your kind letter for the treat-ment of leucorrhea, I can say that I have been entirely cured by the use of Lydia E. Pinkham's remedies, and will gladly recommend them to my friends,"—Riss A. B. Davids, Binghamton, N.Y.
